

Which is actually better:
"PPA or GoO"?

PPA

PPA or GoO

”

Both are equally important for power procurement.

A PPA* contract secures the long-term supply of power and GoO* at a fixed price. The buyer can thus reduce its portfolio risks and secure the supply of green power.

* PPA (Power Purchase Agreement), GoO (Guarantees of origin)

PPA application area

PPA | Power Purchase Agreement

- Long-term security of green power supply
- Terms of > 10 years are possible
- Necessary if the focus is on GoOs from new plants

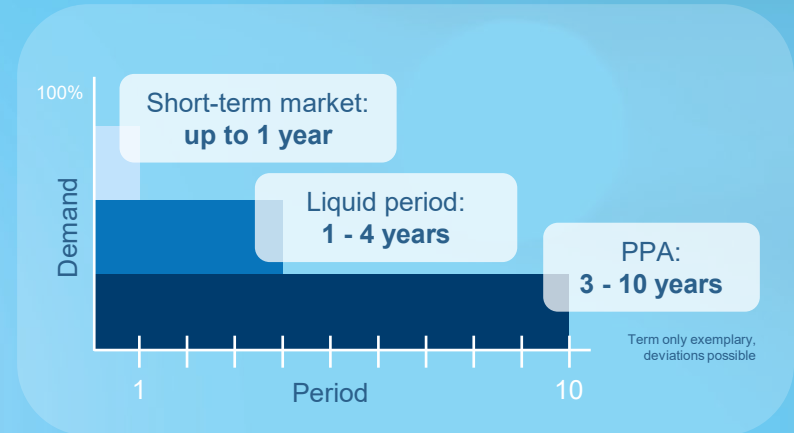

PRO

- | Planning security
- | Protection of the current power position as well
- | More direct influence on expansion of renewable energies possible

CONTRA

- | Higher complexity requirements for credit protection

GoO area of application

GoO | Guarantees of origin

Greening of power volumes already procured, e.g. to compensate for forecast deviations (short- and medium-term nature)

PRO

- | Flexibility
- | Low complexity

CONTRA

- | Availability uncertain
- | Not available long-term
- | Price fluctuations

PPA

Ready for the future of energy supply?

Our team will be happy to accompany you on this journey.
